Agenda

Understand core capabilities

The building blocks of Microsoft Fabric as a unified SaaS analytics platform.

Build a unified foundation

Land every data type once in OneLake with open Delta format and OneCopy.

Transform raw data to insight

Ingest, clean, and shape data with Data Factory and Spark pipelines.

Report & dashboard in Power BI

Design interactive, governed reports for every stakeholder.

Accelerate with AI (Copilot)

Summaries, visuals, DAX, and natural-language exploration.

Apply to business scenarios

Map Fabric to real reporting problems teams solve every day.

Objectives

- Understand how Microsoft Fabric unifies data integration, data engineering, Power BI, OneLake, and AI-powered analytics in a single platform.
- Explore hands-on techniques for building interactive dashboards and insightful reports.
- Learn how to transform data into actionable insights for better business decision-making.
- Discover practical Microsoft Fabric use cases through real-world business scenarios.

Problem - Fragmented Analytics

Copy 3

Microsoft Fabric does it all—in a unified solution

An end-to-end analytics platform that brings together all the data and analytics tools that organizations need to go from the data lake to the business user

Rapid

Valuable

What is OneLake ?

Build One Analytics Foundation with OneLake

Instead of copying data across fragmented services, land it once in OneLake. Every Fabric experience — and Power BI's Direct Lake — reads the same governed copy.

No data silos

Every team works from one governed source of truth.

No duplication

OneCopy removes redundant copies and ETL sprawl.

Open & governed

Delta-Parquet format with tenant-wide security.

Transform Raw Data into Business Insight

- 1 Connect**
Bring in common business sources with Data Factory pipelines & shortcuts.
- 2 Clean & shape**
Power Query and Spark handle nulls, types, merges, and profiling.
- 3 Model**
Star-schema semantic models, relationships, and quick DAX measures.
- 4 Visualize**
Publish trustworthy datasets ready for reporting and AI analysis.

Bronze → Silver → Gold

The medallion pattern refines data in stages — raw landing, cleaned/conformed, then business-ready aggregates that feed reports.

Interactive Reports & Dashboards with Power BI

Right visual for the question

KPI cards, bar, line, matrix, funnel and scatter — matched to the metric.

Interactive by design

Slicers, cross-filtering, and drill-through for self-service exploration.

Audience-tailored reports

Views built for executives, managers, and field teams alike.

Publish & share securely

One-click publish to the Fabric service with row-level governance.

Accelerate with Copilot in Fabric & Power BI

Generative AI woven into every workload — transform, analyze, and report faster.

Report summarization

Auto-generate narratives that explain key findings in plain language.

Visual creation

Build visuals and explore insights without writing queries.

DAX generation

Describe a calculation; Copilot writes the DAX measure.

Model documentation

Auto-describe tables, columns, and measures for the team.

Chat with your data

Ask questions in natural language and get instant answers.

Responsible by design

Governed, tenant-scoped, and built for responsible AI use.

Fabric Across Common Reporting Scenarios

Break down data silos

Unify departmental data in OneLake for one enterprise view.

Real-time dashboards

Monitor operations live with Real-Time Intelligence alerts.

Customer 360

Blend sales, service, and web data for retail & eCommerce.

Financial reporting

Automate close, compliance, and regulatory reporting.

Predictive analytics

Run ML on governed data to forecast demand and risk.

Self-service BI

Give business users governed, Copilot-assisted reporting.

Customer spotlight Energy company Centrica used Microsoft Fabric to unify disparate data, handle billions of rows, and deliver faster, more responsive finance reporting.

KEY TAKEAWAYS

- 1 **One platform, end to end**
Fabric unifies ingestion, engineering, warehousing, science, real-time, and BI.
- 2 **OneLake is the foundation**
Store data once in open Delta format; every workload reads the same copy.
- 3 **Power BI + Copilot**
Interactive, governed reporting accelerated by natural-language AI.
- 4 **Built for business impact**
Fewer silos, faster reporting, and analytics teams can actually trust.

The Next Step:

**Continue your Learning &
Get Microsoft Certified**

Getting Microsoft Certified:

What are the benefits of certification?

Stand out

Certified employees **get greater recognition** of skills due to validation¹

Earn more

23% of Microsoft certified technologists **earn up to 20% more**²

Advance

49% believe cloud certifications **increase employability**³

¹ 2017 IDC-Microsoft, [Cloud Skills and Organizational Influence: How Cloud Skills Are Accelerating the Careers of IT Professionals](#) white paper

² 2017 Pearson VUE, [Value of Certification](#) white paper

³ 2017 [Nigel Frank International Microsoft Technology for Business Salary Survey](#)

Broadcast certified skills

Instant employer verification

This badge is issued by Microsoft

Skills

Unlock the value of **Microsoft Open Badges**

- **Social** - help you share your skills on the social platform of your choosing and your own personal communication
- **Discoverable** – helps people find you and employers who may be interested
- **Verified** – official verification from Microsoft of your accomplishment

Explore the eBook:

Let the data speak

When organizations maintain a culture of certification and continuous learning, the results are both substantial and measurable: **well-trained and certified teams are almost 20% more productive than other staff.**

Quantify the value of a growth mindset and training. In this eBook, you'll see stats and facts on how certification benefits both employees and organizations, including:

- How training improves timeliness, insight, and business impact
- The personal and career benefits of certification
- The direct relationship between continuous learning and higher pay
- How certification improves productivity, efficiency, and job satisfaction

Grow your business & career with Official Microsoft **Role-Based** Instructor-led Classroom Training

Key Highlights:

- Highly interactive discussions on your specific **real-world use cases** and business contexts with **Microsoft Certified Trainers** who come with technical subject matter expertise
- Get **180-day** access to extensive virtual labs for practicing and mastering your Microsoft Fundamental Skills.
- Get **90-day** access to the recordings of your Instructor-led classes
- Full Access to **NetCom365 learner portal**
- Opportunities of **FREE repeats**
- Experience **24x7 priority support**

Some facts about Microsoft Certification Renewals

Benefits of renewing your certification

- Maintain your Microsoft Certification with a continuous learning mindset and keep your skills current at no cost.
- Validate your skills with the latest technology updates that affect the job role.
- Renew your certification without having to pay for and pass any exam(s).

Certification renewal requirements

- If you hold a valid Microsoft role-based or specialty certification that expires within approximately six months, you may renew it.
- You will receive an email from Microsoft Certification team 6 months prior to your certification expiration date, once your certification is eligible for renewal.
- To renew your certification, pass the associated assessment on Microsoft Learn *before* your certification expires.
- Passing the renewal assessment on Microsoft Learn is the only way to renew a certification. You cannot renew your certification by passing an exam, even if it's a new or updated version of the exam you initially passed to earn the certification.
