Netcom Learning

AGENDA

- ✓ What Microsoft 365 Copilot is (and isn't)
- ✓ Security & trust fundamentals
- ✓ Free vs paid Copilot
- ✓ Real-world use cases
- ✓ Adoption roadmap and best practices

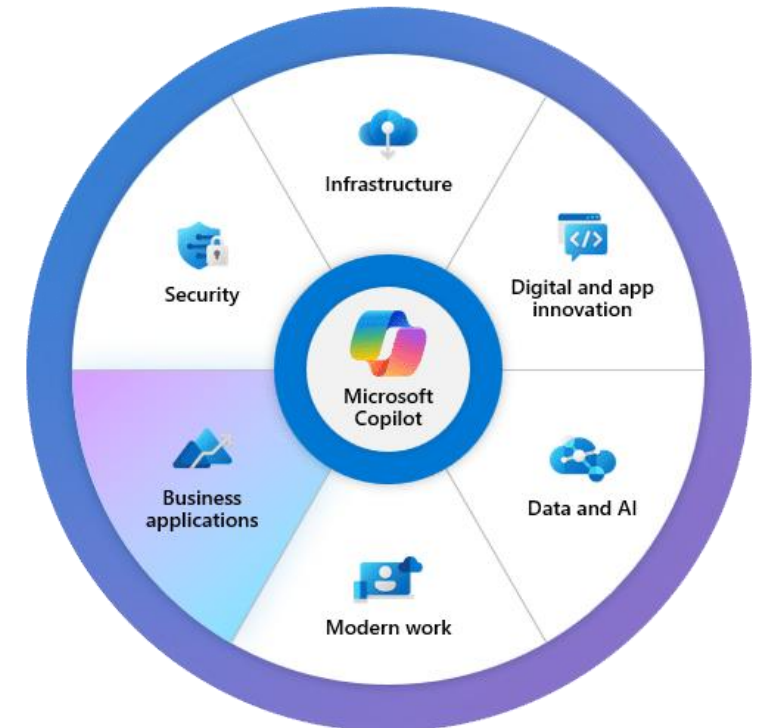

What Copilot Is (and Isn't)

What Copilot *Is*

- AI-powered assistant inside Microsoft 365
- Helps improve productivity and collaboration
- Works across Word, Excel, Outlook, Teams & PowerPoint
- Automates repetitive tasks and content creation

What Copilot *Isn't*

- Not a replacement for employees
- Not always 100% accurate
- Not responsible for approvals or decisions
- Not a substitute for governance or security policies

Copilot assists humans — it does not replace human judgment.

Where Copilot Helps vs Human Responsibility

Where Copilot Helps	Where Humans Stay Responsible
Draft emails and documents	Verify accuracy
Summarize meetings and chats	Make business decisions
Analyze Excel data	Review sensitive content
Generate presentations	Ensure compliance
Automate repetitive tasks	Apply critical thinking

Copilot speeds up work, but accountability always stays with people.

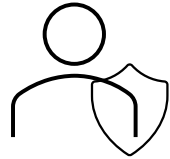

Security & Trust Basics

Three core principles guide safe Copilot usage across your organization.

Data Boundaries

Secure data access strictly within Microsoft 365 permissions — no exceptions, no bypasses.

Permissions Matter

Access is governed by each user's role. Well-managed permissions are your first line of defense.

Credential Compromise

Avoid entering sensitive information into prompts. When in doubt, leave it out.

Copilot's built-in compliance and responsible AI protections give your organization a strong foundation — proper user habits and IT governance complete the picture.

Security & Trust Basics

Built on Trust from the Ground Up

Permissions:
Respects existing
Microsoft 365 access
controls

Compliance:
Enterprise-grade
governance built in

Privacy:
Responsible AI with
strong data
protections

Boundaries:
Data stays within your
organizational
perimeter

How Microsoft 365 Copilot safeguards your data, respects your permissions, and upholds enterprise-grade standards — so your organization can adopt AI with confidence.

Enterprise-Grade Security & Compliance

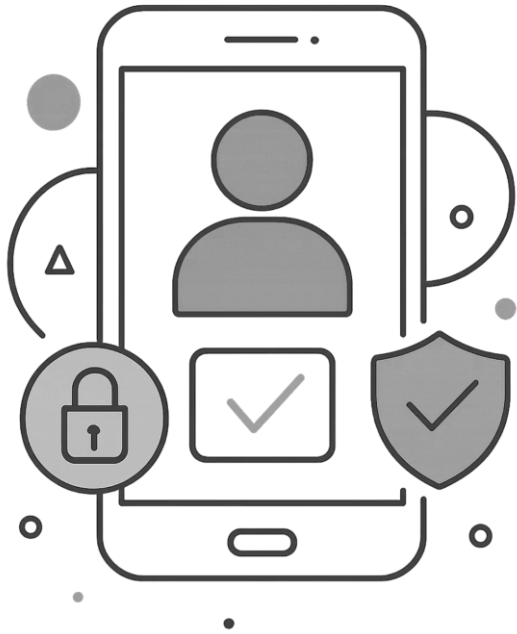

What's included

- eDiscovery and audit log support
- Data Loss Prevention (DLP) policy enforcement
- Retention and records management integration
- Alignment with ISO 27001, SOC 2, and GDPR frameworks

✓ Copilot inherits the compliance posture already configured in your Microsoft 365 tenant.

Responsible AI & Privacy Protections

No Training on Your Data

Microsoft does not use your organizational data to train foundation AI models. Your content remains yours.

Prompts Are Not Shared

Interactions with Copilot are not accessible to other tenants or used to improve general AI systems.

Responsible AI Principles

Built on Microsoft's six core responsible AI principles: fairness, reliability, privacy, inclusivity, transparency, and accountability.

Data Stays Within Organizational Boundaries

All processing occurs within your Microsoft 365 trust boundary. Data is not routed to external services or stored outside your tenant's compliance region.

Your data sovereignty and regional residency commitments are fully maintained.

Copilot only surfaces content a user is already authorized to access. It enforces existing role-based access controls, sensitivity labels, and sharing permissions — no new attack surface is created.

Free vs. Paid: Which Copilot Is Right for You?

Key Differentiator:

The licensed seat unlocks organizational context — Copilot goes from generic assistant to a tool that knows your meetings, your documents, your teammates.

- ❑ Paid seats require eligible Microsoft 365 plans. Check minimum requirements before purchasing.

Readiness Checklist Before You Deploy

	License & Eligibility Eligible Microsoft 365 plan confirmed for target users
	Permissions Audit SharePoint & OneDrive oversharing reviewed and remediated
	Purview Compliance Data classification, retention, and sensitivity labels in place
	User Readiness Champions identified, initial training plan drafted
	Acceptable Use Policy Copilot safe-use guidelines communicated to all users

Microsoft's proven adoption framework — used by thousands of organizations globally — ensures Copilot delivers measurable value at every stage, not just on day one.

Art of the Possible: Copilot in Action

See how Microsoft Copilot transforms everyday work across your organization — from the boardroom to the help desk. Real prompts, real outcomes, real time saved.

Executive: Briefings & decisions

Sales & Marketing: Proposals & content

HR & Operations: Policies & workflows

Finance: Reports & analysis

IT & Support: Tickets & docs

Executive & Leadership

More Strategy, Less Admin

Senior leaders spend hours each week in meetings and sifting through updates. Copilot changes that equation immediately.

Business Value

- ✓ Faster decision-making
- ✓ Reduced meeting overload
- ✓ More time for strategic work

Instant Meeting Summaries

Senior leaders spend hours each week in meetings and sifting through updates. Copilot changes that equation immediately.

Briefings on Demand

Generate concise executive briefings and action item lists directly from your notes or emails.

Presentation Drafts

Turn bullet-point notes into a structured PowerPoint draft ready to refine, not start from scratch.

Close Faster. Engage Better.

- ✓ Faster customer communication
- ✓ Improved productivity
- ✓ Better customer engagement

Summarize customer conversations,
extract key opportunities, & identify agreed
next steps automatically.

Generate compelling proposals,
campaign briefs, and marketing
copy in a fraction of the time.

Draft professional, personalized follow-up emails immediately after a customer meeting tailored to the conversation.

HR & Operations

Streamline People Processes

HR and operations teams manage a constant flow of documentation, communications, and coordination. Copilot handles the heavy lifting.

Business Value

- ✓ Reduced administrative work
- ✓ Faster onboarding processes
- ✓ Improved internal communication

Less Admin

Automate policy drafting and feedback summaries

Faster Onboarding

Reduce time-to-productivity for new starters

Clearer Comms

Consistent, professional internal communications

Finance & Analysts

Transforming how finance teams work — from manual number-crunching to intelligent, conversational analysis.

Business Value

- ✓ Faster reporting
- ✓ Improved insights
- ✓ Reduced manual analysis time

Natural Language Analysis

Ask questions about your Excel data in plain English — no formulas or pivot tables required.

Report Generation

Automatically produce financial summaries, variance reports, and executive briefings in seconds.

Trend & Anomaly Detection

Surface hidden patterns, outliers, and key insights across large datasets without manual review.

IT & Support Teams

Copilot helps IT and support teams resolve issues faster, document more thoroughly, and share knowledge more effectively — reducing toil and improving service quality.

Business Value

- ✓ Faster issue resolution
- ✓ Better documentation
- ✓ Improved support efficiency

Summarize Incidents

Instantly condense complex support tickets and incident logs into clear summaries with recommended next actions.

Draft Technical Documentation

Generate first-draft runbooks, KB articles, and troubleshooting guides directly from incident data.

Organize Troubleshooting Info

Structure and surface dispersed knowledge so engineers spend less time searching and more time solving.

Copilot Adoption Path

Phase1: Awareness Workshop

Build foundational understanding of Microsoft 365 Copilot — helping users gain confidence, explore capabilities, and identify where AI can make an immediate difference.

Copilot Overview:
Capabilities walkthrough, free vs paid tiers, and security & trust fundamentals

"Art of the Possible":
Introductory demos that bring real-world use cases to life for attendees

Pilot Readiness:
Identify early adopters and map initial use cases to business workflows

✓ Outcome: Users leave with confidence, clarity, and a shortlist of high-value use cases ready to pilot.

Phase2: N+ Enablement Path

Scale Copilot adoption across the entire organization through structured, department-specific enablement — turning early momentum into enterprise-wide productivity transformation.

Advanced Enablement:
Deep-dive training with department-specific use cases and workflow integration

Governance & Responsible AI:
Policies, guardrails, and best practices embedded from the start

Adoption Tracking:
Change management frameworks and metrics to measure impact and sustain momentum

✓ Outcome: Structured, scalable AI adoption delivering measurable productivity gains across the organization.

Key Takeaways

Copilot Enhances Productivity

Helps employees save time and reduce repetitive work
Improves collaboration, communication, and content creation

Security & Trust Matter

Copilot respects existing permissions and data boundaries
Responsible usage and governance remain essential

Humans Stay Responsible

AI assists with work, but human judgment is still critical
Users must review, validate, and approve outputs

Paid Copilot Unlocks Enterprise Value

Deep integration with Microsoft 365 business data
Personalized insights and workflow automation

Start Small, Then Scale

Begin with awareness workshops and pilot users
Expand adoption through structured enablement and training

The Next Step:

**Continue your Learning &
Get Microsoft Certified**

Getting Microsoft Certified:

What are the benefits of certification?

Stand out

Certified employees **get greater recognition** of skills due to validation¹

Earn more

23% of Microsoft certified technologists **earn up to 20% more**²

Advance

49% believe cloud certifications **increase employability**³

¹ 2017 IDC-Microsoft, [Cloud Skills and Organizational Influence: How Cloud Skills Are Accelerating the Careers of IT Professionals](#) white paper

² 2017 Pearson VUE, [Value of Certification](#) white paper

³ 2017 [Nigel Frank International Microsoft Technology for Business Salary Survey](#)

Broadcast certified skills

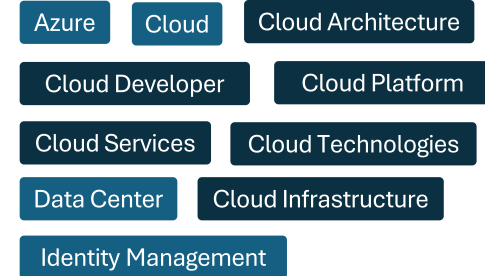

Instant employer verification

This badge is issued by Microsoft

Skills

Unlock the value of **Microsoft Open Badges**

- **Social** - help you share your skills on the social platform of your choosing and your own personal communication
- **Discoverable** – helps people find you and employers who may be interested
- **Verified** – official verification from Microsoft of your accomplishment

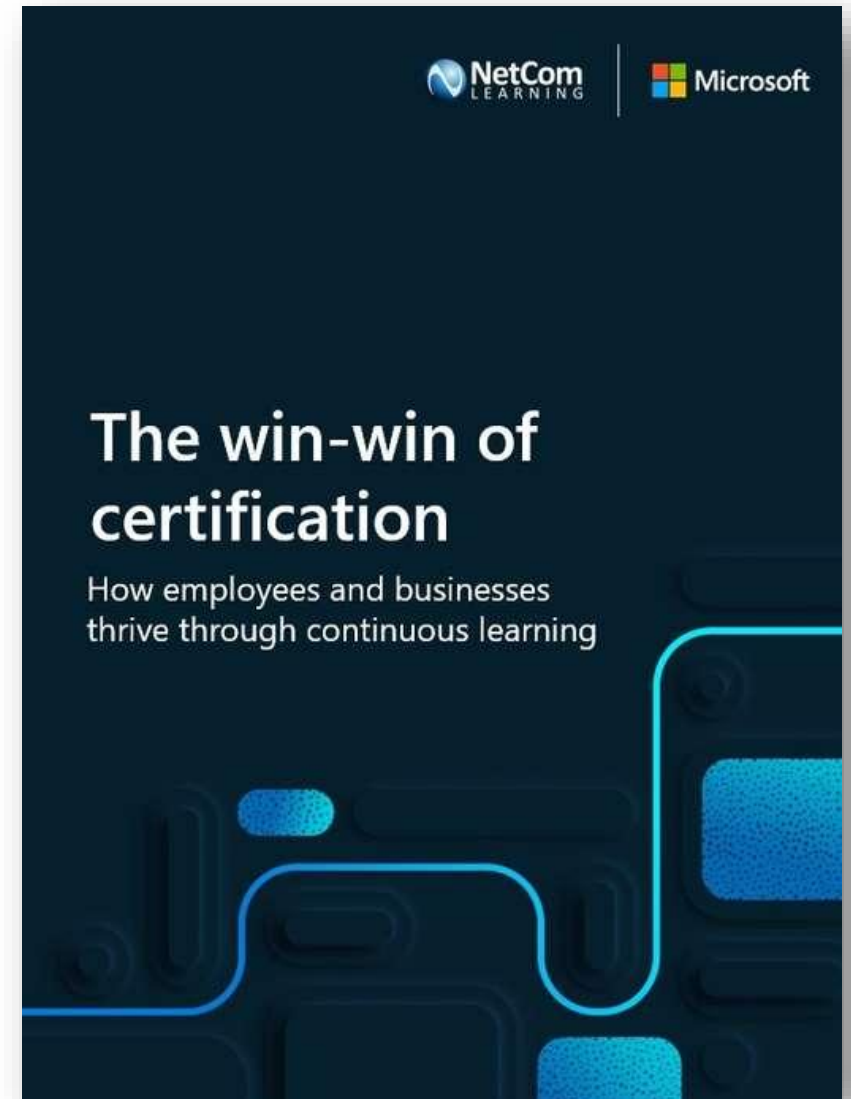

Explore the eBook:

Let the data speak

When organizations maintain a culture of certification and continuous learning, the results are both substantial and measurable: **well-trained and certified teams are almost 20% more productive than other staff.**

Quantify the value of a growth mindset and training. In this eBook, you'll see stats and facts on how certification benefits both employees and organizations, including:

- How training improves timeliness, insight, and business impact
- The personal and career benefits of certification
- The direct relationship between continuous learning and higher pay
- How certification improves productivity, efficiency, and job satisfaction

Grow your business & career with Official Microsoft **Role-Based** Instructor-led Classroom Training

Key Highlights:

- Highly interactive discussions on your specific **real-world use cases** and business contexts with **Microsoft Certified Trainers** who come with technical subject matter expertise
- Get **180-day** access to extensive virtual labs for practicing and mastering your Microsoft Fundamental Skills.
- Get **90-day** access to the recordings of your Instructor-led classes
- Full Access to **NetCom365 learner portal**
- Opportunities of **FREE repeats**
- Experience **24x7 priority support**

Some facts about Microsoft Certification Renewals

Benefits of renewing your certification

- Maintain your Microsoft Certification with a continuous learning mindset and keep your skills current at no cost.
- Validate your skills with the latest technology updates that affect the job role.
- Renew your certification without having to pay for and pass any exam(s).

Certification renewal requirements

- If you hold a valid Microsoft role-based or specialty certification that expires within approximately six months, you may renew it.
- You will receive an email from Microsoft Certification team 6 months prior to your certification expiration date, once your certification is eligible for renewal.
- To renew your certification, pass the associated assessment on Microsoft Learn *before* your certification expires.
- Passing the renewal assessment on Microsoft Learn is the only way to renew a certification. You cannot renew your certification by passing an exam, even if it's a new or updated version of the exam you initially passed to earn the certification.
